📍 | **299 Unit3 El Negro Apartment, Malusak, Santa Ana Bulakan, Bulacan**

Education

● **Bachelor of Science in Information Technology**

Bulacan State University Meneses Campus

Triple Junction Matungao Bulakan, Bulacan

Batch: 2023-2024

I finish my college the year 2024 but even before graduated I started working to prepare myself and develop a proper working habit.

Skills

PHP ●●●○○ (●●●○○)

C++ ●●●○○

C# ●●○○○

javascript ●●●○○

HTML/CSS ●●●○○

Skills:

● **Web Development**

Back-End

I am focusing on using PHP language and XAMPP (SQL) as backend in my projects as well as integration of API when the function requires databases that I cannot produce but needed in the project also functions that requires location maps, email sending, payments etc. Overall I made several admin panel and has multiple unique functions.

Front-End

In frontend I am fluent in using HTML, CSS and Javascript but later on I started learning several frameworks which is Laravel and React JS. I start using framework because I observe upon making projects with a team all of you should have similar framework to use to easily integrate and modify the output of each other, aside from that it also has a lot of benefits as well.

Others

I also have experience using the following: Figma, Drupel, Wix, Wordpress and shopify

Experience:

● 3 Months on the job training at Armed Forces of the Philippines
From: February 13, 2024 - June 10, 2024

● Currently employed as IT in Armed Forces of the Philippines
From: June 10, 2024 - Still currently employed

Certification:

On the job training - Armed Forces of the Philippines
486 Hours
10th day of June

OPEN-SOURCE INTELLEGENCE TRAINING (OSINT)
19 FEBRUARY TO MARCH 1 2024

I hereby certify that the information stated above are true and correct.
